PREFACE

India, on account of its geographical position, geological setting and climate has had a fair share of disasters of varying magnitudes from time immemorial. Natural Disasters have been occurring at an alarming frequency claiming large number of human lives each time they strike in the country. Every year as much as six per cent of the country's population is affected by disasters. In absolute numbers this is second only to China.

The Tenth Five Year Plan suggested some important parameters for building a robust and sound information database based on knowledge sharing, information dissemination and public awareness aspects. Information is in fact a vital parameter for facilitating the quick action for saving the lives and livelihoods during disasters. A directory with relevant phone numbers is of immense use during an emergent situation for a nation.

Under the Disaster management Act 2005, NIDM has the responsibility of developing a database of all knowledge based institutions and provide them with a platform for sharing their experiences and activities. To cater to this mandate and fill in the gap of proper documentation, NIDM is bringing out a directory of experts, Ministries, departments and other stakeholders. This documentation is an effort to develop a resource that can be extensively used by all possible users, besides knowledge based institutions, to share their expertise, achievements and knowledge in the field of disaster management to other takers.

I congratulate NIDM team and acknowledge their contribution in this endeavour. I hope this directory would be useful for disaster managers engaged in different sectors and they will utilize it in promoting the collaborative efforts to reduce the disaster risk in the country.

R. K. Srivastava

Dr. SATENDRA, IFS
Executive Director

Foreword

A well considered strategy and flexible mechanisms are necessary in order to make disaster risk reduction a reality. This calls for a concerted effort on part of several sectors, including national and state governments and NGOs. A crucial component involves sensitizing civil servants on disaster mitigation issues so that they bring to bear the appropriate perspective in planning, implementing, communicating and monitoring activities related to disaster management.

In NIDM's vision, disaster risk reduction is possible only through promotion of a "Culture of Prevention" involving all stakeholders; working through strategic partnership with various ministries and departments of central, state and local governments, academic, research and technical organizations in India and abroad. Coordination among different stakeholders is must for effective disaster management. Proper knowledge about the stakeholders/role-player's contact details, their capacity and specialization help in facilitating the coordination.

Keeping it in view, the present document i.e. 'Directory of Institutions and Resource Persons in Disaster Management' has been developed by way of compilation of information from different reliable sources. Alongwith contact details of various institutes, departments, organizations etc., dealing in disaster management; the document also contains list of renowned resource persons in the field of disaster management and important websites.

I am thankful to Dr. A.D. Kaushik and Ms. Megha Kohli, for their sincere efforts to compile the information. The efforts made by Lt. Col. (Retd.) P.K. Pathak and Dr. Amir Ali Khan, to review the document also need special thanks. The efforts made by Dr. Surya Parkash and Mr. S. K. Tiwari for publishing the document are highly appreciated.

Special care has been taken to make the information provided as authentic as possible. Any omission from the list is not intentional. NIDM is looking forward for receiving comments and suggestions for further improvement of the Directory.

I hope the Directory would be useful for disaster managers engaged in different sectors and they will utilize it in promoting the collective efforts to reduce the disaster risk in the country.

(Satendra)

About NIDM

The National Institute of Disaster Management is one of the youngest national institutes in the country. As per Disaster Management Act 2005, NIDM acts with nodal national responsibilities for human resource development, capacity building, training, research, documentation and policy advocacy in the field of disaster management.

Within a short period the Institute has emerged as one of the key institutions of disaster management, working in tandem with the National Disaster Management Authority, and Central, State and Local governments and various other stakeholders to make a disaster resilient India by developing and promoting a culture of prevention and preparedness at all levels.

Located centrally at the Indraprastha Estate on the Mahatma Gandhi Road, within the campus of the IIPA, the Institute has a multi-disciplinary team of professionals working on different aspects of capacity development on disaster management. It is equipped with state-of-art facilities of training and research on disaster management. It has fully air conditioned Training and Conference Halls, well stocked Library, GIS Laboratory, Computer

Centre, and Video Conference Hall.

The Institute has strategic partnerships with a number academic, research and technical organizations in India and around the world. It promotes networking among knowledge based institutions and encourages inter-disciplinary research on different aspects of disaster management.

The Institute supports Disaster Management Centres set up in the Administrative Training Institutes of the States and the Union Territories. At present there are 30 such Centres located mainly in State capitals. Six of these Centres are being developed as Centres of Excellence in the field of Disaster Management.

The Institute also hosts the SAARC Disaster Management Centre (SDMC) which has jurisdiction over eight Member States of the South Asian Association of Regional Cooperation, namely Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan and Sri Lanka. The Centre has developed a Regional Framework on Disaster Management in South Asia and further facilitated development of as many nine different road maps on different aspects of disaster risk reduction in South Asia, based on which a series of projects have been taken up to enhance regional cooperation on disaster management.

Vision

- ♦ To be a premier Institute of Excellence for training and research on disaster risk mitigation and management in India and to be recognized as one of the leading Institutions at the International level in the field of disaster management.
- ♦ To strive relentlessly towards making a disaster resilient India by developing and promoting a culture of prevention and preparedness at all levels,

Mission

- ♦ To work as a think tank for the Government by providing assistance in policy formulation and;
- ♦ To facilitate in reducing the impact of disasters through:
 - Planning and promoting training and capacity building services including strategic learning.
 - Research, documentation and development at national level information base.
 - System development and expertise promotion for effective disaster preparedness and mitigation.
 - Promoting awareness and enhancing knowledge and skills of all stakeholders.
 - Strengthening institutional mechanisms for training and capacity building of all stakeholders.
 - Networking and facilitating exchange of information, experience and expertise.

Strategic Plan

To build a national hub to share and learn and to create a critical mass of institutions, trainers and trained professionals.

- ♦ To undertake quality research covering both natural and human induced disasters, with a multi-hazard approach
- ♦ To work as a National Resource Center for the central and state governments in the country through effective knowledge management and sharing of best practices
- ♦ To professionalise disaster risk reduction and emergency management in India and other neighboring countries by developing an independent cadre of professionally trained emergency and mitigation managers.
- ♦ To promote formal training and education for disaster management in India and in the region
- ♦ To build working partnerships with the Government,

universities, NGOs, corporate bodies and other national and international Institutes of eminence.

- ♦ To link learning and action by building a synergy between institutions and professionals in the sector.

IMPORTANT WEBSITES RELATED TO DISASTER MANAGEMENT

1. **Advanced National Seismic System (ANSS)**

Advanced National Seismic System (ANSS) is part of the USGS Geologic Discipline and the USGS component of the congressionally established, multi-agency NEHRP.

<http://earthquake.usgs.gov/monitoring/anss/>

2. **American Geophysical Union (AGU)**

It is the largest and biggest geo-scientific union of the world, working towards developing strategies for collaboration (joint meetings and publications) with other learned societies, develop an interface between our science and other disciplines and carry out interdisciplinary research to address key societal issues. It has huge library on earthquake genesis, and earthquake risk programs from its numerous scientific publications, journals and volumes from conferences and symposia.

<http://www.agu.org/>

3. **ASEAN Earthquake Information Center (AEIC)**

The role of AEIC is to rapidly disseminate information on earthquakes and their associated events from the countries of its Association of South East Asian Nations.

<http://aeic.bmg.go.id/>

4. **Asian Disaster Reduction Centre (ADRC)**

The Asian Disaster Reduction Center is established in Kobe, Hyogo Prefecture, to facilitate exchange of disaster reduction experts from several Asian countries and concerned bodies, accumulate and provide disaster reduction information, and carry out research into multinational disaster reduction cooperation as the focus of this initiative.

<http://www.adrc.asia/>, <http://www.adrc.or.jp/>

5. **Bangladesh Meteorological Department**

Bangladesh Meteorological Department is the authorized Government organization for all meteorological activities in the country. It maintains a network of surface and upper air observatories, radar and satellite stations, agro-meteorological observatories, geomagnetic and seismological observatories and meteorological telecommunication system. The Department has its Headquarters in Dhaka with two regional centers i.e. Storm Warning Centre (SWC), Dhaka and Meteorological & Geophysical Centre (M

& GC), Chittagong. It has mandate to maintain earthquake records of the latest, recent and historical events along with seismic network monitoring of the country available with its site:

<http://www.bmd.gov.bd/>

6. Canadian Association of Earthquake Engineering (CAEE)

Canadian association of Earthquake Engineering (CAEE) is involved in earthquake engineering practice and research , which has comprehensive earthquake inventory.

<http://www.caee.uottawa.ca/>

7. Center for Snow and Avalanche Studies

The Center for Snow and Avalanche Studies enhances the interdisciplinary investigation of the snow system's behavior and role in human/environment relationships by offering resources - people, information, and facilities - for field-based research and education.

www.snowstudies.org

8. Consortium of Organisations for Strong Motion Observation Systems (COSMOS)

Its objectives include developing policies, promoting the advancement of strong-motion measurement in densely urbanized areas, distribution of strong-motion data and facilitate the use of strong-motion data to achieve improved earthquake resistance of the built environment through research and engineering practice.

<http://www.cosmos-eq.org/>

9. Cooperative Institute for Dynamic Earth Research (CIDER)

The goals of CIDER are to provide an optimal environment for transformative studies, to educate a new generation of Earth scientists for contributing towards deep earth studies. The ultimate goal of CIDER is to develop an integrative conceptual model drawing upon all contributing disciplines to understand the origin, evolution, and dynamics of the Earth.

<http://www.deep-earth.org/>

10. Czech Hydro-meteorological Institute (CHMI)

The object of CHMI's activity is to establish and operate monitoring stations with the aid of a telecommunications network; to process the results of observations, measurements and monitoring; to create and maintain data bases; to provide information on conditions, characteristics and regimes; to provide forecasts and warnings; to carry out scientific research activities.

www.chmi.cz/index.html

11. Dartmouth Flood Observatory

The Observatory detects, maps, measures, and analyzes major flood events world-wide using satellite remote sensing. The record of such events is preserved here as a World Atlas of Flood Hazard. Also provided are yearly catalogs, large-scale maps, and images of river floods, from 1985 to the present. As the archive of reliable data grows, it is increasingly possible to predict where and when major flooding will occur, and to analyze trends over time. www.dartmouth.edu/~floods

12. Department of Geology and Mines (DGM), Bhutan

The Department of Geology and Mines (DGM) of Bhutan has two divisions – Geological Survey of Bhutan (GSB) and Mining Division. It carries out geologic mapping, mineral exploration, geo-technical investigations, and other services related to geosciences. It is also involved in time series monitoring of glaciers, risk assessment for glacial lake outburst flood (GLOF), studies related to landslides, neotectonics, seismicity, and other things related to geo-hazards. <http://www.moea.gov.bt/DGM%20website/dgm.html>

13. Department of Hydrology and Meteorology (DHM), Nepal

The Department of Hydrology and Meteorology (DHM) is a nodal organization under the Ministry of Environment, Government of Nepal. It has mandate to collect and disseminate hydrological and meteorological information for water resources, agriculture, energy, and other development activities. It also issues hydrological and meteorological forecasts for public, mountaineering expedition, civil aviation, and for the mitigation of natural disasters. www.hydrology.gov.np

14. Department of Meteorology, Sri Lanka

This is the nodal agency of Sri Lanka to conduct seismological monitoring of the region and disseminate information related to it to the public. <http://www.meteo.slt.lk/>

15. Department of Water Induced Disaster Prevention (DWIDP), Nepal

Department of Water Induced Disaster Prevention (DWIDP), Nepal was established on 7 February 2000 under the Ministry of Water Resources, Nepal. The main goal of DWIDP is to contribute in achieving the national goal of poverty alleviation through minimizing human casualties and damages of infrastructures due to water induced disasters by the appropriate management and conservation of rivers and river basins of Nepal. Since its inception DWIDP is mainly working in technology development work, training, study and information work and water-induced disaster mitigation work. <http://www.dwidp.gov.np/introduction/index.php>

16. **DHI Water and Environment**

DHI Water & Environment is an independent research and consultancy organisation and have the objectives: to build competence and promote technological development in areas relevant to water, environment and health in the fields of ecology and environmental chemistry, water resources, hydraulic engineering and hydrodynamics as well as other related fields.

<http://www.dhi.dk>

17. **Drought Monitoring Centre (DMC)**

Drought Monitoring Centre in Nairobi is a regional center that serves 24 countries in the eastern and southern African sub-region. The main objectives of the centre is to contribute to monitoring, prediction, early warning and mitigation of adverse impacts of extreme climatic events on agricultural production and food security, water resources, energy, and health among other socio-economic sectors.

www.dmcn.org

18. **Earthquake Engineering Research Institute**

Earthquake Engineering Research Institute. Its objective is to reduce earthquake risk by advancing the science and practice of earthquake engineering, improving understanding of the impact of earthquakes on the physical, social, economic, political, and cultural environment, and also by advocating comprehensive and realistic measures for reducing the harmful effects of earthquakes.

<http://www.eeri.org/site/>

19. **Emergency Management Institute (EMI), FEMA, USA**

To support the Department of Homeland Security and FEMA's goals by improving the competencies of the U.S. officials in Emergency Management at all levels of government to prepare for, protect against, respond to, recover from, and mitigate the potential effects of all types of disasters and emergencies on the American people.

<http://training.fema.gov/EMI/>

20. **Erosion Control Engineering Lab, Tokyo University of Agriculture and Technology**

Erosion Control Engineering Lab is an academic unit of Tokyo University of Agriculture and Technology, Japan. It has comprehensive documentation of recent landslides in Japan on its web Landslide in Japan.

<http://www.tuat.ac.jp/~sabo/>

21. European Association of Geoscientists & Engineers (EAGE)

It is a professional organization for geoscientists and engineers. The objectives of the association includes to promote the global development and application of geosciences and related engineering subjects, to promote innovation, technical progress and education, and to foster communication, fellowship and cooperation between those working in, studying or being otherwise interested in these fields.

<http://www.eage.org/>

22. European Avalanche Warning Services

Network of 15 countries, which is engaged in avalanche studies.

<http://www.avalanches.org>

23. European Centre for Medium-Range Weather Forecasts (ECMWF)

ECMWF is an independent international organisation supported by 26 European States. The principal objectives of the Centre are: development of numerical methods for medium-range weather forecasting; the preparation, on a regular basis, of medium-range weather forecasts for distribution to the meteorological services of the Member States; scientific and technical research directed at the improvement of these forecasts; collection and storage of appropriate meteorological data.

www.ecmwf.int

24. European Geophysical Union (EGU)

European Geophysical Union (EGU) is an interdisciplinary association. Its main interests include the promotion of sciences of the Earth and its environment and of planetary and space sciences and cooperation between scientists.

<http://www.egu.eu/>

25. European Mediterranean Intensity Database (EMID)

Its scope is to inventory, put together, compile according to uniform standard and format, make available to public and keep updated the intensity data concerning earthquakes located in the Euro-Mediterranean region.

<http://emidius.mi.ingv.it/EMID/>

26. European Seismological Commission-SESAME project

It was developed within the framework of several recent projects on global and regional seismic hazard assessment and allows for homogeneous hazard computation throughout the whole European-Mediterranean domain.

<http://wija.ija.csic.es/gt/earthquakes/>

27. **European-Mediterranean Seismological Center (EMSC)**

European-Mediterranean Seismological Center (EMSC) website, provides real time information of earthquakes with a magnitude ≥ 5 in Euro-med, or ≥ 6 in the world. Engaged in rapid determination of earthquake parameters, encouraging scientific co operation, exchange of seismological data etc. It also works towards functioning of European seismological data bank.

<http://www.emsc-csem.org/#2>

28. **Federal Emergency Management Agency, USA**

Federal Emergency Management Agency is a nodal government organization of United States that looks after all type of disaster. Its main aim is to reduce the loss of life and property and protect communities nationwide from all hazards, including natural disasters, acts of terrorism, and other man-made disasters. This page provides important resources on landslides like what to do before, during and after landslide. It has good documentation of information and photographs of major landslides.

www.fema.gov/hazard/landslide

29. **Federation of Digital Seismograph Networks (FDSN)**

Its membership comprises groups responsible for the installation and maintenance of seismographs either within their geographic borders or globally. It works to provide stations with good geographic distribution, recording data with 24 bits of resolution in continuous time series with at least a 20 sample per second sampling rate. The FDSN was also instrumental in development of a universal standard for distribution of broadband waveform data and related parametric information.

<http://www.fdsn.org/>

30. **Geological Survey of India (GSI)**

Geological Survey of India is the fourth oldest Geological Survey of the world from where discovery of the Earth's core and identification of the body and surface waves on the recorded seismograms were, first time, made in the world. It is provider of basic earth science information to the government, industry and the general public, as well as responsive participant in international geo-scientific activities. It hosts huge geo scientific database for research, mineral exploration, seismic hazard studies etc. A total of 6-permanent Seismological observatories ascribed to Geological Survey is been located in different parts of the country (e.g., Adampur, Sikkim; Agartala, Tripura; Itanagar, Arunachal Pradesh; Jabalpur, Maharashtra; Lucknow, Uttar Pradesh ; and Nagpur, Maharashtra). Spotlight on recent earthquakes of India and the world with brief report is available with GSI webpage:

<http://www.gsi.gov.in/>

31. **Geomorphology Group**

Geomorphology group at CNR IRPI in Perugia, Italy is a team of geologists, engineers and physicists interested mostly in landslides, landslide hazards, and the definition of the associated risk. Its researches mostly focus on landslide inventory, mapping, rock fall modeling, hazard mapping, risk management and data base management. It has good record of publication, images and videos on landslides.

www.safeland-fp7.eu

32. **Global Geodynamics Project (GGP)**

It is a proposal to monitor changes in the Earth's gravity field at periods of seconds and longer. It provides meticulously collected SG data and enables global signals to be extracted by various stacking procedures that would not be possible with single station recordings.

<http://www.eas.slu.edu/GGP/ggphome>

33. **Global Seismographic Network (GSN)**

The Global Seismographic Network (GSN) is a global digital seismic network providing free, real time, open access data.

<http://www.iris.edu/hq/programs/gsn>

34. **IGAD Climate Prediction and Applications Centre (ICPAC)**

IGAD Climate Prediction and Applications Centre is a regional Centre in Africa responsible for climate prediction and applications for climate risk management, environmental management, and sustainable development. It serves seven countries; Djibouti, Eritrea, Ethiopia, Kenya, Somalia, Sudan and Uganda as well as Burundi, Rwanda and Tanzania.

www.icpac.net/index.html

35. **Incorporated Research Institutes for Seismology (IRIS)**

University consortium sponsored by NSF. A dedicated consortium of monitoring seismic activities is established to undertake seismological monitoring by deploying Broadband and Long-period instruments in all over the world. The seismic data is freely available from its network linked to following.

<http://www.iris.edu/hq/>

36. **India Meteorological Department (IMD)**

India Meteorological Department is the nodal body of Government of India for meteorological observations (data collection, cyclone information) and information, monitoring of seismic activity. It also issues warning on weather phenomena like tropical cyclones, norwesters, duststorms, heavy rains and snow, cold and heat waves etc.

www.imd.gov.in/main_new.htm

37. Institute of Seismological Research (ISR), Gandhinagar

Institute of Seismological Research, India is fully dedicated to seismological research and is planned to be developed into an international institute. Round the clock monitoring of seismic activity of Gujarat is done by ISR through a dense network of 50 broadband seismograph station (20 connected by VSAT) and 50 Strong Motion Accelerograph in Gujarat and reporting earthquake location as well as their magnitudes within 10 minutes of the arrival of seismic waves.

<http://isr.gujarat.gov.in/>

38. International Centre for Integrated Mountain Development (ICIMOD)

The International Centre for Integrated Mountain Development (ICIMOD) is a Nepal based regional knowledge development and learning centre serving the eight regional member countries of the Hindu Kush-Himalayas; Afghanistan, Bangladesh, Bhutan, China, India, Myanmar, Nepal, and Pakistan. ICIMOD is mainly working to assist mountain people to understand climate changes and their adaptation to them. It also provides good archives of their publication on mountain ecology and natural disaster like landslide, flood, GLOFs etc.

<http://icimod.org/>

39. International Centre for Water Hazard and Risk Management

International Centre for Water Hazard and Risk Management (ICHARM) is a research organization for water and related hazard. It is under the auspices of UNESCO and hosted by the Public Works Research Institute (PWRI), Japan. ICHARM has actively involved in research, training and information networking in an integrated manner both on flood and related disaster.

www.icharm.pwri.go.jp

40. International Consortium on Landslides

The International Consortium on Landslides (ICL), an International non-governmental and non-profit scientific organization, has been established during Kyoto Symposium in January 2002. It is supported by the United Nations Educational, Scientific and Cultural Organization (UNESCO), the World Meteorological Organization (WMO), the Food and Agriculture Organization of the United Nations (FAO), the United Nations International Strategy for Disaster Reduction (UN/ISDR), and intergovernmental programmes such as the International Hydrological Programme of UNESCO; the Government of Japan; and other governmental bodies. It archives the worldwide data on landslides event. It regularly publishes very reputed journals "Landslides".

www.iclhq.org

41. International Flood Network

International Flood Network has as its objective to facilitate international cooperation in flood management: to reduce the loss of life and damage caused by floods, to promote policies and practices which can break the vicious circle of poverty and environmental degradation and lead to a safe and sustainable future.

www.internationalfloodnetwork.org

42. International Landslide Centre, Durham University, UK

International Landslide Centre at Durham University is a research organization that provides both academic degree as well as training on landslides. Research is a fundamental part of its activities and mainly focuses on landslide mechanisms, movement, hazard and risk assessment, vulnerability and low cost data collection techniques. It has good archive of data base on landslide worldwide.

www.landslidecentre.org

43. International Research Institute for Climate and Society (IRI)

International Research Institute for Climate and Society is an international research organization on climate risk management. Its main objective is to deliver and improve climate science; develop, explore and evaluate climate risk management strategies in developing world. It also captures and manages knowledge, trains and shares information in support of managing climate related risks

<http://portal.iri.columbia.edu/portal/server.pt>

44. International Seismological Center (ISC)

It is the oldest centre having global earthquake catalogue used by the world. Its main objective being redetermination of earthquake locations making use of all available information, and to search for new earthquakes, previously unidentified by individual agencies.

<http://www.isc.ac.uk/>

45. International Union of Geodesy and Geophysics (IUGG)

International Union of Geodesy and Geophysics (IUGG) has actively been involved in advancing, promoting, and communicating knowledge of the Earth system, its space environment, and the dynamical processes causing change. The site of the society contains several set of information on seismogenesis and geodesy.

<http://www.iugg.org>

46. International Union of Geological Sciences (IUGS)

The International Union of Geological Sciences (IUGS) is one of the largest and most active non-governmental scientific organizations in the world. It promotes and encourages the study of geological problems, especially

those of world-wide significance, and supports and facilitates international and interdisciplinary cooperation.

<http://www.iugs.org/>

47. Japan Meteorological Agency (JMA)

Japan Meteorological Agency (JMA) is a national organization of Japan. It monitors weather related phenomenon, volcanoes, earthquake, tsunami etc. It serves as one of the world's most advanced authorities in the field of national meteorological services, and fulfills a leading role in both national and international responsibilities. It has mandate to issue weather warning, marine warning and tropical cyclone information.

www.jma.go.jp/jma/indexe.html

48. Landslide Research Team - University of Wollongong, Australia

Landslide Research Team at University of Wollongong, Australia is a group of researchers working on various aspects of Landslide. The main themes of ongoing researches are, rainfall analysis, landslides inventories, assessment of landslide hazard and susceptibility and monitoring.

www.uow.edu.au/eng/research/landslide/index.html

49. Mekong River Commission (MRC)

The MRC is a river basin organization that provides the institutional framework to promote regional cooperation in order to implement the agreement between the governments of Cambodia, Lao PDR, Thailand and Viet Nam.. The MRC serves its member states by supporting decisions and promoting action on sustainable development and poverty alleviation as a contribution to the UN Millennium Development Goals.

www.mrcmekong.org/

50. Middle-East- Seismological Forum (MSEF)

Middle-East- Seismological Forum (MSEF) provides earthquake information on the Middle Eastern Region.

<http://www.meseisforum.net/>

51. National Disaster Management (NDM) Division, MHA, India

The Division is responsible for response, relief and preparedness for natural calamities and man-made disasters (except drought and epidemics). The Division is also responsible for legislation, policy, capacity building, prevention, mitigation and long term rehabilitation.

<http://www.ndmindia.nic.in/>

52. National Disaster Management Authority (NDMA)

The National Disaster Management Authority (NDMA), headed by the Prime Minister of India, is the Apex Body for Disaster Management in India.

The setting up of the NDMA and the creation of an enabling environment for institutional mechanisms at the State and District levels is mandated by the Disaster Management Act, 2005.

<http://ndma.gov.in/ndma/index.htm>

53. National Drought Mitigation Center (NDMC), USA

The National Drought Mitigation Center (NDMC) is based in the School of Natural Resources at the University of Nebraska-Lincoln. It mainly helps people and institutions to develop and implement measures to reduce societal vulnerability to drought, stressing preparedness and risk management rather than crisis management. The Centers mainly works on information management system, drought portal, drought monitoring, drought planning and mitigation; drought policy; advising policy makers, collaborative research, K-12 outreach, workshops for federal, state, and foreign governments and international organizations, organizing and conducting seminars, workshops, and conferences; and providing data to and answering questions for the media and the general public.

www.drought.unl.edu

54. National Earthquake Hazard Reduction Program (NEHRP)

Website of National Earthquake Hazard Reduction Program (NEHRP) provides information on practices and policies, techniques of earthquake risk reduction and improving the understanding of earthquakes.

<http://www.nehrp.gov/>

55. National Earthquake Information Center (NEIC)

National Earthquake Information Center (NEIC) is dedicated to determine rapidly the location and size of all destructive earthquakes worldwide and to immediately disseminate this information to concerned national and international agencies, scientists, and the general public.

<http://earthquake.usgs.gov/regional/neic/>

56. National Geophysical Research Institute (NGRI), Hyderabad

National Geophysical Research Institute (NGRI), India is a premier geophysical research institute engaged in several important geo-scientific projects.

<http://ngri.org.in/>

57. National Hurricane Centre, USA

The National Hurricane Center (NHC), USA is a constituent of the National Centers for Environmental Prediction (NCEP). It has mission to save lives, mitigate property loss, and improve economic efficiency by issuing the best watches, warnings, forecasts, and analyses of hazardous tropical

weather and by increasing understanding of these hazards. It provides storm information, cyclone data base and history.
www.nhc.noaa.gov/index.shtml

58. National Information Center for Earthquake Engineering (NICEE), IIT Kanpur.

The site is available for past researches on Indian earthquakes. Reports and published papers may be referred from this site.
<http://www.nicee.org/>

59. National Institute of Disaster Management

The National Institute of Disaster Management constituted under the Disaster Management Act 2005 has been entrusted with the nodal national responsibility for human resource development, capacity building, training, research, documentation and policy advocacy in the field of disaster management. Upgraded from the National Centre for Disaster Management of the Indian Institute of Public Administration on 16th October, 2003, NIDM is steadily marching forward to fulfill its mission to make a disaster resilient India by developing and promoting a culture of prevention and preparedness at all levels.
www.nidm.gov.in

60. National Weather Service (US)

The National Weather Service (NWS) provides weather, hydrologic, and climate forecasts and warnings for the United States, its territories, adjacent waters and ocean areas, for the protection of life and property and the enhancement of the national economy. NWS data and products form a national information database and infrastructure which can be used by other governmental agencies, the private sector, the public, and the global community.
www.weather.gov

61. Nepal Landslide Society

The Nepal Landslide Society (NELS) is a national non-governmental and non-profit professional scientific organization. NELS mainly aims at contributing to the reduction of loss of life and property due to landslides, glacial lake outburst flood (GLOF), erosion, floods and so on through study and research on related science and technology to mitigate and prevent such disasters. It is actively engaged to raise awareness on landslide disaster in Nepal.
www.nels.org.np/

62. North Carolina Geological Survey, US

North Carolina Geological Survey, US is a government organization working in the field of geology and geological disasters. It provides extensive in-

formation on landslide types, events, causes and triggers. It has also great collection of photographs of models related to landslide hazard.

www.geology.enr.state.nc.us/Landslide_Info/Landslides_main.htm

63. North East Institute of Science and Technology (NEIST), Jorhat

The institution has mandate to monitor the seismo-geodetic activities of the entire northeast region of India with support of Government of India. NEIST has a generated huge real-time seismological data recorded by a series of seismographs ascribed to NEIST, which can be consulted from it web site;

<http://www.rrljorhat.res.in/>

64. Observatories and Research Facilities for European Seismology (OREFUS)

Observatories and Research Facilities for European Seismology (OREFUS) provides recent earthquake data. It is also involved in gathering, archiving and providing waveform data and coordinating data availability and relevant developments.

<http://www.orfeus-eu.org/>

65. Pacific Tsunami Warning Center

The National Weather Service (NWS) provides weather, hydrologic, and climate forecasts and warnings for the United States, its territories, adjacent waters and ocean areas, for the protection of life and property and the enhancement of the national economy. NWS data and products form a national information database and infrastructure which can be used by other governmental agencies, the private sector, the public, and the global community.

www.prh.noaa.gov/ptwc

66. Pakistan Meteorological Department (PMD)

Pakistan Meteorological Department is a government organization established for scientific research and service delivery. It is responsible for providing meteorological service throughout Pakistan to wide variety of interests. Besides this, it is also concerned with Agrometeorology, Hydrology, Astronomy and Astrophysics (including solar physics), Seismology, Geomagnetism, Atmospheric Electricity and studies of the Ionosphere and Cosmic Rays.

www.pakmet.com.pk

67. Philippine Institute of Volcanology and Seismology (PHIVOLCS)

Its activities include developing a systematic network of stations, adapt and develop technologies, conduct research on various issues and promote public awareness on the significance of volcanic activity, earth-

quakes and related geotectonic processes and their threats and possible benefits to man.

<http://www.phivolcs.dost.gov.ph/>

68. Puerto Rico Seismic Network

It provides information about monthly and annual report of earthquakes, list of earthquakes with magnitude > 3.5 or reported felt in the periphery of Mexico and its adjoining region.

<http://redsismica.uprm.edu/>

69. River Net

The European Rivers Network, is a non profit NGO and was founded in co-operation with International Rivers Network.

www.rivernet.org/

70. SAARC Disaster Management Centre

SAARC Disaster Management Centre (SDMC) was set up in October 2006 at the premises of National Institute of Disaster Management in New Delhi. The Centre has the mandate to serve eight Member Countries of South Asia Association of Regional Cooperation (SAARC) - Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan and Sri Lanka - by providing policy advice and facilitating capacity building services including strategic learning, research, training, system development and exchange of information for effective disaster risk reduction and management in South Asia.

<http://saarc-sdmc.nic.in>

71. SAARC Meteorological Centre (SMRC)

SAARC Meteorological Centre is a regional organization for SAARC region to undertake research on weather related areas. It also carries out data compilation, weather monitoring for special phenomena of interest and develop networking system between the Centre and the member countries in order to get data to undertake its activities and to provide the processed information to the members states.

www.saarc-smrc.org

72. SAARC Meteorological Research Centre (SRMC), Bangladesh

SRMC is engaged in Compiling climatological information for the region required for weather forecasting and agricultural activities, developing a networking system between the Centre and the member countries and undertaking research relevant to weather prediction and better understanding of monsoon and other weather phenomena of particular interest to the SAARC region.

www.saarc-smrc.org

73. Seismological Society of America (SSA)

It is engaged in promoting research in seismology, protect the community against disasters due to earthquakes, dissipate information to the public through publications, lectures and other means. It has members throughout the world representing a variety of technical interests: seismologists and other geophysicists, geologists, engineers, insurers, and policy-makers in preparedness and safety.

<http://www.seismosoc.org/>

74. Seismological Society of Japan (SSJ)

The objectives of SSJ include promoting studies of earthquakes and the interior of the Earth, sharing and disseminating the results and towards contributing to earthquake disaster mitigation. Its site contains important information on past earthquakes and seismicity pattern, including the discovery of Wadati - Benioff zone in the subduction regime.

<http://www.soc.nii.ac.jp/ssj/>

75. Society of Earthquake and Civil Engineering Dynamics

Society of Earthquake and Civil Engineering Dynamics was founded to promote the study and practice of earthquake engineering and civil engineering dynamics, and acts as a forum for professionals.

<http://www.seced.org.uk/index.php>

76. Southern California Earthquake Data Center

Southern California Earthquake Data Center is a global seismological data center. Its mission is to ensure and maintain an easily-accessible, well-organized, high-quality, searchable archive of earthquake data for research in seismology and earthquake engineering. The 1932-to-present Caltech/USGS catalog maintained by the SCEDC is the most complete archive of seismic data for any region in the United States.

<http://www.data.scec.org/>

77. The Department of Hydrology and Meteorology (DHM) Nepal

DHM has a mandate from Government of Nepal to monitor all the hydrological and meteorological activities in Nepal. No agency is entitled to carry out such activities without a proper liaison with DHM. The scope of work includes the monitoring of river hydrology, climate, agrometeorology, sediment, air quality, water quality, limnology, snow hydrology, glaciology, and wind and solar energy. General and aviation weather forecasts are the regular services provided by DHM.

www.dhm.gov.np

78. The Department of Mines and Geology (DMG), Nepal

The Department of Mines and Geology (DMG) is the sole government organization which is responsible for all types of geological survey, mineral

exploration and administration of Mining Rules and Regulations in Nepal. It deals with systematic geo-scientific studies, investigation of mineral resources and their development activities in the country. Engineering and environment geological mapping and Hazard assessment of fast growing urban areas, and publication of Engineering and environment geological maps which are suitable for multiple use especially in infrastructure development planning and urban area development. It is also involved in seismic/ tectonic studies and earthquake monitoring to delineate the earthquake hazard/ risk areas, publication of Earthquake epicenter maps and conduct earthquake awareness programs in different parts of the country especially densely populated urban areas.

<http://www.dmgnepal.gov.np/>

79. The Energy and Resources Institute

TERI was formally established in 1974 with the purpose of tackling and dealing with the immense and acute problems that mankind is likely to face within the years ahead

- on account of the gradual depletion of the earth's finite energy resources which are largely non-renewable and
- on account of the existing methods of their use which are polluting

<http://www.teriin.org>

80. The Japan Landslide Society

The Japan Landslide Society, a scientific society dealing with landslides in Japan, was established in 1963. The main aim of the society is to conduct research on landslides and related phenomena, and countermeasures for preventing such disasters, and acceptance and support funding for research project.

www.landslide-soc.org/english/index.html

81. The National Snow and Ice Data Center

The National Snow and Ice Data Center (NSIDC) is part of the Cooperative Institute for Research in Environmental Sciences at the University of Colorado at Boulder. NSIDC supports research on snow, ice, glaciers, frozen ground, and climate interactions that make up Earth's cryosphere. It also manages and distributes scientific data, creates tools for data access, supports data users, performs scientific research, and educates the public about the cryosphere.

www.nsidc.org/

82. U.S. Geological Survey

The USGS is a science organization that provides impartial information on the health of our ecosystems and environment, the natural hazards that threaten us, the natural resources we rely on, the impacts of climate and land-use change, and the core science systems that help us provide timely,

relevant, and useable information.

www.usgs.gov

83. UN WOMEN

UN Women is the UN organization dedicated to gender equality and the empowerment of women. On 1 January 2011, it came to life in nine countries of South Asia. UN Women was formed by merging four organizations, including UNIFEM.

<http://www.unwomensouthasia.org/>

84. UNAIDS

UNAIDS, the Joint United Nations Programme on HIV/AIDS, is an innovative partnership that leads and inspires the world in achieving universal access to HIV prevention, treatment, care and support. UNAIDS fulfills its mission by:

- Uniting the efforts of the United Nations system, civil society, national governments, the private sector, global institutions and people living with and most affected by HIV;
- Speaking out in solidarity with the people most affected by HIV in defense of human dignity, human rights and gender equality;
- Mobilizing political, technical, scientific and financial resources and holding ourselves and others accountable for results;
- Empowering agents of change with strategic information and evidence to influence and ensure that resources are targeted where they deliver the greatest impact and bring about a prevention revolution; and
- Supporting inclusive country leadership for sustainable responses that are integral to and integrated with national health and development efforts.

www.unaids.org.in

85. UNDP

UNDP is the UN's global development network, advocating for change and connecting countries to knowledge, experience and resources to help people build a better life. We work in 166 countries through a network of 135 country offices worldwide, working with them on their own solutions to global and national development challenges. UNDP does not represent any one approach to development; rather, our commitment is to assist partner governments in finding their own approaches, according to their own unique national circumstances. UNDP is committed to help India achieve the global Millennium Development Goals (MDGs) as well as the national objectives articulated in consecutive Five-Year Plans. The goal of the organization is to help improve the lives of the poorest women and men, the marginalized and the disadvantaged in India.

<http://www.undp.org.in>

86. UNFPA

UNFPA, the United Nations Population Fund, is an international development agency that promotes the right of every woman, man and child to enjoy a life of health and equal opportunity. UNFPA supports countries in using population data for policies and programmes to reduce poverty and to ensure that every pregnancy is wanted, every birth is safe, every young person is free of HIV/AIDS, and every girl and woman is treated with dignity and respect.

UNFPA has played a critical role in assisting India in redirecting its population efforts away from family planning targets and quotas and focusing instead on providing high-quality services within a comprehensive reproductive healthcare system.

<http://india.unfpa.org/>

87. UNHCR

The UN refugee agency emerged in the wake of World War II to help Europeans displaced by that conflict. Optimistically, the Office of the United Nations High Commissioner for Refugees was established on December 14, 1950 by the United Nations General Assembly with a three-year mandate to complete its work and then disband. The following year, on July 28, the United Nations Convention relating to the Status of Refugees - the legal foundation of helping refugees and the basic statute guiding UNHCR's work - was adopted.

<http://www.unhcr.org/cgi-bin/texis/vtx/page?page=49e4876d6>

88. UNIC

The United Nations Information Centre in New Delhi covers India and Bhutan and was the first United Nations office to be established in independent India in 1947. Its activities reflect a broad spectrum: the Centre plays a major role in publicizing UN initiatives and programmes, engaging in a variety of outreach activities, like lectures, media briefings and press conferences, TV and radio interviews, exhibitions etc. UNIC conducts information activities on behalf of UN agencies without local representation and maintains close co-operation with and assists UN agencies based in India.

<http://www.unic.org.in/>

89. UNICEF

UNICEF has been working in India since 1949. The largest UN organisation in the country, UNICEF is fully committed to working with the Government of India to ensure that each child born in this vast and complex country gets the best start in life, thrives and develops to his or her full potential.

<http://www.unicef.org/india/>

90. UNIDO

The UNIDO India office covers seven countries and acts as a focal point to mobilize knowledge, information, skills and technology
www.unido.org/office/india

91. United States Geological Survey

The United States Geological Survey (USGS) is a multi-disciplinary science organization that focuses on biology, geography, geology, geospatial information, and water. It provides extensive information and data base on several natural disasters like earthquake, landslide, volcano, flood, tsunami, hurricane etc.
<http://landslides.usgs.gov>

92. United States Geological Survey (USGS)

United States Geological Survey provides comprehensive real-time earthquake data bank, with privilege of obtaining information on recent and past earthquakes. Its activities include maintaining comprehensive earthquake monitoring, improving the understanding of earthquakes, occurrence and their effects and consequences and improving earthquake hazard identification and risk assessment methods and their use.
<http://earthquake.usgs.gov/earthquakes/>

93. UNODC

The United Nations Office on Drugs and Crime (UNODC) was established in 1997 as part of the UN reform combining the previous United Nations Drug Control Programme and the Center for International Crime Prevention. The mandate of the Office is enshrined in the United Nations (UN) conventions like the three UN conventions on drugs, the UN Convention against Transnational Organized Crime and its three Protocols on Trafficking in Persons, on Smuggling of Migrants by Land, Sea and Air and on Illicit Manufacturing of and Trafficking in Firearms, the UN Convention against Corruption, and the universal instruments against terrorism. With the help of these instruments, UNODC helps Member States address illicit drugs, crime and terrorism. The Regional UNODC Office for South Asia works in six countries: Bangladesh, Bhutan, India, Maldives, Nepal and Sri Lanka. It was established in 1987 and is based in New Delhi, India.
<http://www.unodc.org/southasia/>

94. UN-WFP

The World Food Programme, in India, works in collaboration with governments and non-governmental agencies to develop innovative hunger solutions. Through its various programmes, WFP aims to reduce food insecurity and malnutrition amongst the vulnerable group, especially women and children. Besides, WFP also supports the Government of India to attain the Millennium Development Goals. WFP's projects aim at enhancing

the nutritional value of food through fortification, improving targeting of government food-based programmes, developing new food products to reach out to those with greater nutritional needs such as children below 3 years and for people with special needs such as those living with HIV. It also supports livelihood activities in difficult geographical locations.

<http://www.wfp.org/in/>

95. USAID

Declaring it the defining partnership of the 21st century, the Obama Administration is committed to a strategic partnership with India consistent with its status as a regional power, its performance as a successful free market democracy, and its continuing need to improve conditions for the millions of its citizens who live in poverty. USAID is partnering with India to develop, test, and deploy innovative technologies to address global challenges of food security, climate change, and health. USAID supports programs and provides technical assistance in coordination with the Government of India's (GOI) flagship health programs, including the National Rural Health Mission and the National AIDS Control Program, to help India integrate health services and nutrition to improve maternal, newborn, and child health; stem global disease threats, including HIV/AIDS, polio, and TB; and improve the delivery of water and sanitation services.

<http://www.usaid.gov/in/>

96. Wadia Institute of Himalayan Geology (WIHG), Dehradun

A dedicated Institute to carry out detailed research on geology, seismology, geochemistry and paleontology with special reference to the Himalayan region. There are several permanent seismological observatories ascribed to WIHG, including one multi Parametric Geophysical Observatories (MPGO). There is good inventory of continuous records of earthquakes, occurring in the Himalayan region.

<http://www.wihg.res.in/>

97. WHO

WHO is the United Nations' specialized agency for Health. It is an inter-governmental organization and works in collaboration with its member states usually through the Ministries of Health. WHO's objective is the attainment by all people of the highest possible level of health.

WHO's Secretariat is staffed by health professionals, other experts and support staff working at headquarters in Geneva, six regional offices and country offices.

<http://whoindia.org/EN/Index.htm>

98. World Data Center (WDC)

World data Center, archives huge collection of data.

<http://www.ngdc.noaa.gov/wdc/wdcmain.html>

99. World data Centre for Glaciology, Cambridge

World Data Centre for Glaciology, Cambridge (WDCGC) is funded by the Royal Society and is located in the Library of the Scott Polar Research Institute (SPRI). The Centre supports the work of SPRI's Glaciology and Climate Change Research Group. It is part of the International Council for Science (ICU) World data Center system.

www.wdgcg.spri.cam.ac.uk/

100. World Meteorological Organization (WMO)

The World Meteorological Organization (WMO) is a specialized agency of the United Nations for meteorological observation. It monitors the behaviors of Earth's atmosphere globally through its network of 189 member organization. It also facilitates worldwide cooperation for the making of meteorological, hydrological and other geophysical observations through establishment of networks of stations.

www.wmo.int/pages/index_en.html

101. World Stress Map (WSM)

It is the global compilation of information on the present-day stress field of the Earth's crust. It is a collaborative project between academia, industry and government that aims to characterize the stress patterns and to understand the stress sources. Its main operational areas are Basin modeling, Reservoir characterization and management, Fault-slip tendency and Seismic hazard assessment.

- **Do's and Don'ts of various disasters**

DO's AND DON'Ts OF VARIOUS DISASTERS

FLOOD: BEFORE, DURING AND AFTER

FOR ADMINISTRATION

Pre-Flood Arrangements

- ♦ Convening a meeting of the District Level Committee on Natural Calamities. It consists of Deputy Commissioner/Collector as Chairman with districts line department heads like electricity, police, revenue, home guard, irrigation, telephone, medical, rural development etc as members, to review the arrangements.
- ♦ Check composition and functioning of the Control Room.
- ♦ Closure of past breaches in rivers and canal embankments and guarding of weak points;
- ♦ Rain-recording and submission of rainfall reports;
- ♦ Communication of gauge-readings and preparation of maps and charts;
- ♦ Dissemination of weather reports and flood bulletins issued by the Meteorological Centres, Central Water Commission, Flood Forecasting Organisation;
- ♦ Deployment of boats at desired points;
- ♦ Use of power boats at strategic stations;
- ♦ Installation of temporary police wireless stations and temporary telephones in flood-prone areas;
- ♦ Arrangements for keeping telephone and telegraph lines in order;
- ♦ Storage of food in interior, vulnerable, strategic and key areas;
- ♦ Arrangements of dry food stuff and other necessities of life;
- ♦ Arrangements of keeping the drainage system de silted and properly maintained;
- ♦ Agricultural measures;
- ♦ Health measures;
- ♦ Veterinary measures;
- ♦ Selection of flood shelters;
- ♦ Advance arrangements for army assistance;
- ♦ Training in flood relief work;
- ♦ Organisation of relief parties;
- ♦ Other precautionary measures; and
- ♦ Alternative drinking water supply arrangements.

During floods

- ♦ Organising shelter for the people in distress. In case the efforts of civil authorities are found inadequate, Army, Para Military Force assistance should be requisitioned;

- ◆ Relief measures by non-official and voluntary organizations may be enlisted as far as possible
- ◆ Organise relief camps;
- ◆ Provision of basic amenities like drinking water, sanitation and public health care and arrangements of cooked food in the relief camps;
- ◆ Making necessary arrangements for air dropping of food packets in the marooned villages through helicopters;
- ◆ Organising enough relief parties to rescue the marooned people within a reasonable time limit;
- ◆ Disposal of dead bodies and animal carcasses;
- ◆ Establish alternate communication links to have effective communication with marooned areas;
- ◆ Organising controlled kitchens to supply food initially at least for 3 days;
- ◆ Organising cattle camps, if necessary and provide veterinary care, fodder and cattle feed for the affected animals for at least 3 days;
- ◆ Grant of emergency relief to all the affected people;
- ◆ Submission of daily situation reports and disseminate correct information through mass media to avoid rumours,;
- ◆ Rehabilitation of homeless;
- ◆ Commencement of agricultural activities - desilting, resowing;
- ◆ Repairs and reconstruction of infrastructure facilities such as roads, embankments, resettlement of flood prone areas;
- ◆ Health measures;
- ◆ Relief for economic reconstruction.

Post Flood Management

- ◆ Speedy restoration of roads, rail routes and the postal services;
- ◆ Normal water supply in the affected areas either by arranging tankers or fire tenders;
- ◆ Repair of power, telephone and sewerage lines on priority basis;
- ◆ Proper arrangements for the supply of food, shelter and clothing to the marooned people;
- ◆ Ensuring adequate supply of POL and kerosene oil to keep the supply line moving
- ◆ Constitution of a survey team to assess the loss and compensation to be given to the affected population;
- ◆ Assistance to people in getting insurance claim, who have taken 'crop' and 'house' insurance;
- ◆ Assistance for repair/rebuilding of private properties; and
- ◆ Desilting and dewatering of the inundated areas.

FOR INDIVIDUALS

Before:

- ◆ Find out if you live in a flood-prone area and identify earthen, irrigation,

hydroelectric etc. dams that are upstream from your area, and could be the source of potential problems.

- ◆ Ask your local emergency manager about official flood warning signals.
- ◆ Know the terms “Flood Watch,” “Flood Warning,” and “Urban and Small Stream Warning.”
- ◆ Plan for evacuation.
- ◆ Consider purchasing flood insurance.
- ◆ Take steps to flood proof your home. Call your local building department or emergency management office for information.
- ◆ Keep all insurance policies and your household inventory in a safe place.

During:

- ◆ Listen to All India Radio, local radio or television stations for local information.
- ◆ Be aware of streams, drainage channels and areas known to flood suddenly.
- ◆ If local authorities issue a flood watch, prepare to evacuate.
- ◆ Secure your home. If time permit³, secure items located outside the house.
- ◆ If instructed, turn off utilities at the main switches or valves.
- ◆ Fill your car fuel tank.
- ◆ Fill the bathtub with water in case water becomes contaminated or services are cut off. Sterilize the bathtub first.
- ◆ Stay away from floodwaters.
- ◆ When deep flooding is likely, permit the floodwaters to flow freely into your basement to avoid structural damage to the foundation and the house.
- ◆ Do not attempt to drive over flooded roads. The depth of water is not always obvious. The roadbed may be washed out under the water, and you could be stranded or trapped.

After:

- ◆ Stay away from floodwaters.
- ◆ Stay away from moving water. Moving water six inches deep can sweep you off your feet.
- ◆ Be aware of areas where floodwaters have receded and may have weakened road surfaces.
- ◆ Stay away from and report downed power lines.
- ◆ Stay away from disaster areas unless authorities ask for volunteers.
- ◆ Consider health and safety needs. Wash your hands frequently with soap and clean water if you come in contact with floodwaters.
- ◆ Throw away food that has come in contact with floodwaters.
- ◆ Call your insurance agent.
- ◆ Take photos of or videotape your belongings and your home.
- ◆ Don't throw away damaged goods until an official inventory has been taken.
- ◆ Remember floodwaters can be extremely dangerous. The best protection during a flood is to leave the area and go to shelter on higher ground.

EARTHQUAKE

Before:

- ◆ Identify safe spots and danger zones in each room.
- ◆ Consider buying earthquake insurance.
- ◆ Know where and how to shut off all utilities.
- ◆ Be sure your house is firmly anchored to its foundation.
- ◆ Anchor overhead lighting fixtures.
- ◆ Store bottled foods, glass, china and other breakables on low shelves or in cabinets that can fasten shut.
- ◆ Place large or heavy objects on lower shelves.
- ◆ Fasten shelves to walls. Brace high and top-heavy objects.
- ◆ Repair defective electrical wiring, leaky gas and inflexible utility connections.
- ◆ Securely fasten water heaters and gas appliances.

During:

- ◆ If indoors—take cover under sturdy furniture or against an inside wall, and hold on, “Drop, Cover and Hold”. Stay away from the kitchen!
- ◆ If outdoors stay there. Move away from buildings, street lights and utility wires.
- ◆ In a high-rise building—take cover under sturdy furniture away from windows and outside walls. Stay in the building on the same floor. An evacuation may not be necessary. Wait for instructions from safety personnel. Do not use elevators.
- ◆ In a vehicle stop as quickly as safety permits, and stay in the vehicle. Avoid stopping near or under buildings, trees, overpasses or utility wires.

After:

- ◆ Check for injuries; yourself and those around you.
- ◆ Be prepared for aftershocks.
- ◆ Wear sturdy shoes in areas covered with fallen debris and broken glass.
- ◆ If the electricity is out—use flashlights or battery powered lanterns.
- ◆ Check the main control panel.
- ◆ If you smell gas or hear a hissing sound open a window and leave the building. Shut off the main gas valve outside.
- ◆ If water pipes are damaged shut off the water supply at the main valve.
- ◆ Check your home for structural damage. Check chimneys for damage.
- ◆ Clean up spilled medicines, bleaches, gasoline and other flammable liquids.
- ◆ Visually inspect utility lines and appliances for damage.
- ◆ Do not flush toilets until you know that sewage lines are intact.
- ◆ Open cabinets cautiously. Beware of objects that can fall off shelves.
- ◆ Use the phone only to report a life threatening emergency.
- ◆ Listen to news reports for the latest emergency information.
- ◆ Stay off the streets.
- ◆ Stay away from damaged areas, unless proper authorities have specifically requested your assistance.

FIRE SAFETY TIPS

What to do before a Fire

The following are things you can do to protect yourself, your family, and your property in the event of a fire:

Smoke Alarms

- ♦ Install smoke alarms. Properly working smoke alarms decrease your chances of dying in a fire by half.
- ♦ Place smoke alarms on every level of your residence. Place them outside bedrooms on the ceiling or high on the wall (4 to 12 inches from ceiling), at the top of open stairways, or at the bottom of enclosed stairs and near (but not in) the kitchen.
- ♦ Test and clean smoke alarms once a month and replace batteries at least once a year. Replace smoke alarms once every 10 years.

Escaping the Fire

- ♦ Review escapes routes with your family. Practice escaping from each room.
- ♦ Make sure windows are not nailed or painted shut. Make sure security gratings on windows have a fire safety-opening feature so they can be easily opened from the inside.
- ♦ Consider escape ladders if your residence has more than one level, and ensure that burglar bars and other antitheft mechanisms that block outside window entry are easily opened from the inside.
- ♦ Teach family members to stay low to the floor (where the air is safer in a fire) when escaping from a fire.
- ♦ Clean out storage areas. Do not let trash, such as old newspapers and magazines, accumulate.

Flammable Items

- ♦ Never use gasoline, benzene, naphtha, or similar flammable liquids indoors.
- ♦ Store flammable liquids in approved containers in well-ventilated storage areas.
- ♦ Never smoke near flammable liquids.
- ♦ Discard all rags or materials that have been soaked in flammable liquids after you have used them. Safely discard them outdoors in a metal container.
- ♦ Insulate chimneys and place spark arresters on top. The chimney should be at least three feet higher than the roof. Remove branches hanging above and around the chimney.

Heating Sources

- ♦ Be careful when using alternative heating sources.
- ♦ Check with your local fire department on the legality of using kerosene heaters in your community. Be sure to fill kerosene heaters outside, and be sure they have cooled.

- ◆ Place heaters at least three feet away from flammable materials. Make sure the floor and nearby walls are properly insulated.
- ◆ Use only the type of fuel designated for your unit and follow manufacturer's instructions.
- ◆ Store ashes in a metal container outside and away from your residence.
- ◆ Keep open flames away from walls, furniture, drapery, and flammable items.
- ◆ Keep a screen in front of the fireplace.
- ◆ Have heating units inspected and cleaned annually by a certified specialist.

Matches and Smoking

- ◆ Keep matches and lighters up high, away from children, and, if possible, in a locked cabinet.
- ◆ Never smoke in bed or when drowsy or medicated. Provide smokers with deep, sturdy ashtrays. Douse cigarette and cigar butts with water before disposal.

Electrical Wiring

- ◆ Have the electrical wiring in your residence checked by an electrician.
- ◆ Inspect extension cords for frayed or exposed wires or loose plugs.
- ◆ Make sure outlets have cover plates and no exposed wiring.
- ◆ Make sure wiring does not run under rugs, over nails, or across high-traffic areas.
- ◆ Do not overload extension cords or outlets. If you need to plug in two or three appliances, get a UL-approved unit with built-in circuit breakers to prevent sparks and short circuits.
- ◆ Make sure insulation does not touch bare electrical wiring.

Other

- ◆ Sleep with your door closed.
- ◆ Install A-B-C-type fire extinguishers in your residence and teach family members how to use them.
- ◆ Consider installing an automatic fire sprinkler system in your residence.
- ◆ Ask your local fire department to inspect your residence for fire safety and prevention.

What to do During a Fire

If your clothes catch on fire, you should:

- ◆ Stop, drop, and roll - until the fire is extinguished. Running only makes the fire burn faster.
- ◆ To escape a fire, you should:
- ◆ Check closed doors for heat before you open them. If you are escaping through a closed door, use the back of your hand to feel the top of the door, the doorknob, and the crack between the door and door frame before you open it. Never use the palm of your hand or fingers to test for heat - burning

those areas could impair your ability to escape a fire (i.e., ladders and crawling).

- ♦ Crawl low under any smoke to your exit - heavy smoke and poisonous gases collect first along the ceiling.
- ♦ Close doors behind you as you escape to delay the spread of the fire.
- ♦ Stay out once you are safely out. Do not reenter. Call 9-1-1.

Hot Door	Cool Door
Do not open. Escape through a window. If you cannot escape, hang a white or light-colored sheet outside the window, alerting fire fighters to your presence	Open slowly and ensure fire and/or smoke is not blocking your escape route. If your escape route is blocked, shut the door immediately and use an alternate escape route, such as a window. If clear, leave immediately through the door and close it behind you. Be prepared to crawl. Smoke and heat rise. The air is clearer and cooler near the floor.

What to do After a Fire

The following are guidelines for different circumstances in the period following a fire:

- ♦ **If you are with burn victims, or are a burn victim yourself**, call 101, cool and cover burns to reduce chance of further injury or infection.
- ♦ **If you detect heat or smoke** when entering a damaged building, evacuate immediately.
- ♦ **If you are a tenant**, contact the landlord.
- ♦ **If you have a safe or strong box**, do not try to open it. It can hold intense heat for several hours. If the door is opened before the box has cooled, the contents could burst into flames.
- ♦ **If you must leave your home** because a building inspector says the building is unsafe, ask someone you trust to watch the property during your absence.

- **National Disaster Management Act 2005**
- **National Policy on Disaster Management (2009)**

NATIONAL DISASTER MANAGEMENT ACT 2005

The broad salient features of the DM Act 2005 are enunciated below :-

The parliament of India has enacted the National Disaster Management Act in November 2005, which brings about a paradigm shift in India's approach to disaster management. The centre of gravity stands visibly shifted to preparedness, prevention and planning from earlier response and relief centric approach. The proposed legislation is in the concurrent list of constitution thus having the advantage that it will permit the States also to enact their own legislation on disaster management. The Act provides for establishment of:

- National Disaster Management Authority (NDMA)
- State Disaster Management Authority (SDMA)
- District Disaster Management Authority (DDMA)

Act also provides for -

- Constitution of Disaster Response Fund and Disaster Mitigation Fund at National, State and District levels.
- Establishment of NIDM and NDRF.
- Provides penalties for obstruction, false claims, misappropriation etc.
- It states that there shall be no discrimination on the ground of sex, caste, community, descent or religion in providing compensation and relief

169

National Disaster Management Authority (NDMA)

The Prime Minister of India will be the Chairperson, helped by a Vice Chairperson along with up to a maximum of nine members nominated by Prime Minister. The Authority may constitute an Advisory Committee consisting of experts in the field of disaster management. The Authority shall be assisted by a National Executive Committee of Secretaries to be constituted by Central Government. It lay down the policies, plans and guidelines for disaster management. NDMA shall recommend guidelines for the minimum standards of relief provided to persons affected by disaster.

The National Executive Committee shall prepare a National Disaster Management Plan in consultation with the State Governments which shall include measures for

- Prevention and mitigation of disasters,
- Integration of mitigation measures in the plans,
- Preparedness and capacity building.

State Disaster Management Authority (SDMA) at state level coordinating all activities which comprises of eight members to be nominated by the Chief Minister and the Chairperson of the State Executive Committee. One of the members may be designated as the Vice-Chairperson of the State Authority by the Chief Minister. SDMA may constitute an Advisory Committee of experts, as and when necessary.

The State Government shall establish a **District Disaster Management**

Authority (DDMA) in each district. The District Authority will be headed by District Magistrate and shall consist of members, not exceeding seven, as may be prescribed by the State Government. The District Authority shall act as the district planning, coordinating and implementing body for disaster management.

The Local Authority shall ensure training of its officers and employees and maintenance of resources so as to be readily available for use in the event of a disaster. It ensures that all construction projects under it conform to the standards and specifications laid down. It carries out relief, rehabilitation and reconstruction activities in the affected area within its jurisdiction.

National Institute of Disaster Management (NIDM) is constituted by the Central Government. NIDM shall plan and promote training and research in disaster management & Start documentation, development of national level information base of disaster management policies, prevention mechanisms, mitigation measures & Networking.

National Disaster Response Force (NDRF): The training of eight battalions of Para-military forces has begun, to serve as Disaster Management Response Force (NDRF). It is proposed to establish four training centres in different parts of the country by respective paramilitary forces. A National Disaster Mitigation Fund and a National Disaster Response Fund are proposed to be created. A broad view of disaster administration in the country is depicted in the following figure.

The Government of India has also constituted Cabinet Committee on Management of Natural Calamities and Cabinet committee on Security. Besides above there are High Level Cabinet Committee and Inter Ministerial Group in place.

NATIONAL POLICY ON DISASTER MANAGEMENT (2009)

SALIENT FEATURES:

- ♦ A holistic and pro-active approach for prevention, mitigation and preparedness will be adopted for disaster management.
- ♦ Each Ministry/Department of the Central/State Government will set apart an appropriate quantum of funds under the Plan for specific schemes/projects addressing vulnerability reduction and preparedness.
- ♦ Where there is a shelf of projects, projects addressing mitigation will be given priority. Mitigation measures shall be built into the on-going schemes/programmes
- ♦ Each project in a hazard prone area will have mitigation as an essential term of reference. The project report will include a statement as to how the project addresses vulnerability reduction.
- ♦ Community involvement and awareness generation, particularly that of the vulnerable segments of population and women has been emphasized as necessary for sustainable disaster risk reduction. This is a critical component of the policy since communities are the first responders to disasters and, therefore, unless they are empowered and made capable of managing disasters, any amount of external support cannot lead to optimal results.
- ♦ There will be close interaction with the corporate sector, nongovernmental organizations and the media in the national efforts for disaster prevention/vulnerability reduction.
- ♦ Institutional structures/appropriate chain of command will be built up and appropriate training imparted to disaster managers at various levels to ensure coordinated and quick response at all levels; and development of inter-State arrangements for sharing of resources during emergencies.
- ♦ A culture of planning and preparedness is to be inculcated at all levels for capacity building measures.
- ♦ Standard operating procedures and disaster management plans at state and district levels as well as by relevant central government departments for handling specific disasters will be laid down.
- ♦ Construction designs must correspond to the requirements as laid down in relevant Indian Standards.
- ♦ All lifeline buildings in seismic zones III, IV & V – hospitals, railway stations, airports/airport control towers, fire station buildings, bus stands major administrative centre will need to be evaluated and, if necessary, retro-fitted.
- ♦ The existing relief codes in the States will be revised to develop them into disaster management codes/manuals for institutionalizing the planning process with particular attention to mitigation and preparedness.
